

Member Company Profile – Hoare Lea

Designing the built environment puts the construction profession at a unique intersection. We span technology, economics, local and global regulation, environmentalism and the health and wellbeing of society. We craft the stage where lives play out every day and strive for innovation while maintaining the balance with pragmatism and sensitivity to the local area and people.

‘Hoare Lea’ is an award-winning engineering consultancy with a creative team of engineers, designers and technical specialists. We provide innovative solutions to facility engineering and design challenges for buildings. We provide Mechanical, Electrical and Public Health (MEP), environmental and sustainability services bringing buildings to life and ensuring that they perform in operation as well as they look.

We are engineers of human experiences. Problem solvers who care how a space makes you feel when you step inside – who bring buildings to life. We overcome every challenge with ingenuity, determination, and pride. We take personal responsibility to achieve a shared vision, combining strong relationships with technical excellence.

Cornwall is a very special place, barely in England, with a history of a brave, proud and independent people who have strode the world helping exploit the natural resources available whether that be via metalliferous mining, china clay, fishing or agriculture. It’s a romantic and beautiful place with a tough core and spine, home to beautiful fishing villages, outstanding countryside, surf and a place with fantastic prospects. Who would not want to be involved in Cornwall as it moves forward with its two tremendous Universities, leading-edge hospital and health sector, its superb renewable energy infrastructure and research, its deep-water port plus colleges and schools? In addition, the Spaceport and Goonhilly promise major progress for Cornwall and the UK - this has got to be the most exciting time to be involved.

We believe that Cornwall’s importance can sometimes be overlooked by others, outside the local area, but we understand the important role that the region has to play - we are immensely proud of all the Cornish projects we have been involved in to date, and to be members of Constructing Excellence Cornwall.
